Education

Cornell University – Bachelor of Arts, Computer Science

September 2020 - May 2024

Experience

Smart Software Solutions, Inc.

Pierre, SD

Software Engineer

January 2025 - Present

- Work on multiple full-stack projects with various technologies including Angular, PHP, Java Spring Boot, Visual Basic, and more for clients.
- Create front-end websites and client facing applications with functional back-end APIs.

Projects

Rise 'n Shine

Software Engineer and Project Lead

February 2024 - May 2024

- Led a team of 10 to launch a 2D cross-platform mobile game coded in C++ for a game development competition where 81% of players found the game to be extremely fun.
- Reduced network bandwidth by 97.5% through optimization of network message payloads, which enhanced performance and increased player satisfaction.
- Authored comprehensive technical manuals following rigorous styling standards, which boosted team collaboration.
- Increased workflow efficiency by 50% using Google Sheets for equitable workload distribution, reducing meeting times and increasing development time.
- Streamlined meeting processes, reducing times by 33% with agendas and weekly briefings.
- Achieved 80.9% player satisfaction rate with UI after coordinating and teaching the design team about modern game UI/UX design.

Bubblebound

itch.io

Software Engineer

February 2023 - May 2023

- Created 2D platformer game using Java and LibGDX as part of a team.
- Optimized level design processes by developing Tiled level editing templates, reducing the design team's level creation time by 20% and allowing more time for intricate level design.
- Drafted comprehensive technical documentation, enhancing codebase clarity and improving team communication and collaboration efficiency.
- Reduced design team workload by 50% by creating and editing levels, enabling focus on asset creation and polishing.
- Wrote a comprehensive guide on using the Tiled level editor, eliminating 60% of one-on-one training sessions.

Skills

Programming Languages: C++, C, C#, Python, Java, JavaScript, OCaml, TypeScript, SQL (PostgreSQL), CSS, HTML

Frameworks: Angular, Visual Basic, Spring Boot

Certificates: IBM Relational Database Administration, IBM Python for Data Science, IBM Intro to Data Engineering, IBM Intro to Software Engineering
